BACKGROUND

I am a network and systems programmer. My interests are focused on networking, coding theory, cryptography, and packet radio. I'm happiest when the project I'm working on involves putting theory into practice.

I've worked as a network administrator and a Unix system administrator. For the last two years I've worked for the Portland State University Computer Science Tutors, helping people understand aspects of computer science from systems programming, to computational theory, to data structures and software engineering.

EDUCATION

Portland State University (Portland, OR)

- ▶ M.S. in Computer Science, Fall 2013 - Present
- ▶ M.A. in Writing, Spring 2009 - Summer 2011
- ▶ B.A. in Linguistics, Fall 2003 - Summer 2008

PROFICIENCY

I have been experimenting with network and systems programming since 2010. I've worked on a number of small projects related to networking.

I am most comfortable working in C, but I am also proficient in C++, Java, Bash, Erlang, Python, and SQL.

EXPERIENCE

Portland State University

Computer Science Tutor

- ▶ stuff
